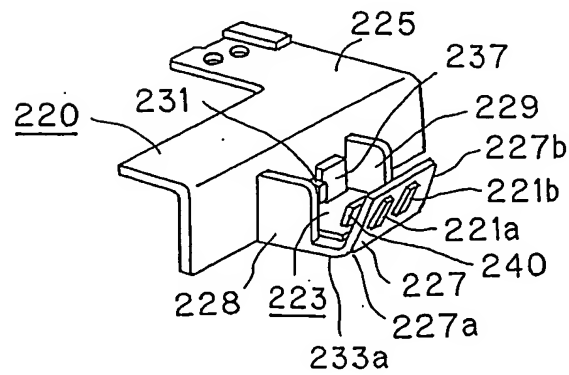

Figure 1 is a perspective view of a first component 120 and a second component 130. The first component 120 is a U-shaped bracket with a top flange 157, side walls 158, and a bottom flange 152. It has a central slot 159 and a side slot 158a. The second component 130 is a rectangular block with a top surface 156, side walls 153, and a bottom surface 151. It has a central slot 153b and a side slot 153a. A dashed line indicates the alignment of the central slots 159 and 153b.

FIG. 28

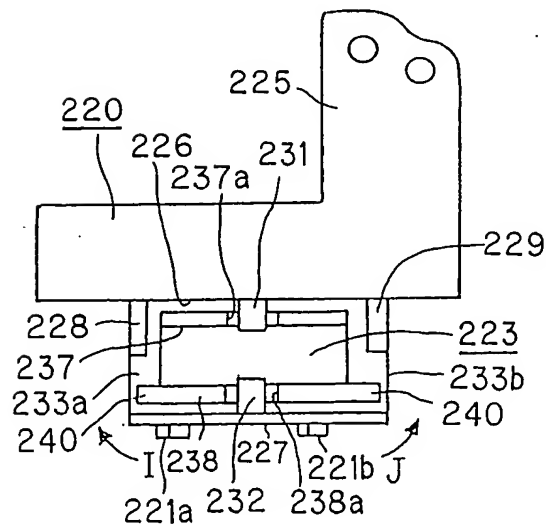

**FIG. 30**

**FIG. 31**

**FIG. 32**

A detailed cross-sectional view of the device. It shows a main body 220 with two circular features at the top right. Below it is a horizontal plate 225. A vertical component 226 is positioned between the plate 225 and a lower assembly. This lower assembly includes a central part 231 supported by a base 228. To the left and right of this central part are side supports or guides labeled 229 and 250 respectively. Further down, there are more complex structures including parts 253 and 254. At the very bottom, there are small rectangular components labeled 221a and 221b, which appear to be rollers or guides. Arrows indicate movement: arrow K points left from the bottom left, arrow L points right from the bottom right, and a long arrow M points left across the bottom.
